4300 Weaver Parkway, Warrenville, IL 60555 Phone: 331-218-2959

Patient:	Klonowski, Jimmy		Referring Physician:	(not specified)	
Birth Date:	06/07/1988	Age:	38.0 years	Patient ID:	(not specified)
Height:	73.0 in.	Weight:	155.0 lbs.	Measured:	06/12/2026 1:28:54 PM (16 [SP 2])
Sex:	Male	Ethnicity:	White	Analyzed:	06/12/2026 1:28:56 PM (16 [SP 2])

Body Composition Analysis (BCA)

DXA or DEXA is a three component model, it quantifies three primary metrics: Bone, Fat & Lean Tissue. These components are then organized into additional metrics which are depicted throughout your report. **Total Mass** = Measured Weight it's the sum of your Fat, Lean & BMC. **Fat Mass** = All Fat Mass including items like brain, bone marrow, ect. **Lean Mass** = Muscle Mass, Organs, Blood and Stomach Contents. **BMC** = Bone Mineral Content; generally 3 - 5% of the total. **Fat Free** = the total of Lean Tissue and BMC.

Measured Date	Total Body Fat %	Total Mass (lbs)	Fat Mass (lbs)	Lean Mass (lbs)	BMC (lbs)	Fat Free (lbs)
06/12/2026	20.2	157.9	31.9	120.1	5.9	126.0 lbs

Body Composition History (Region: Total)

Measured Date	Total Mass (lbs)	Change vs. Baseline (lbs)	Previous (lbs)	Fat Mass (lbs)	Change vs. Baseline (lbs)	Previous (lbs)	Lean Mass (lbs)	Change vs. Baseline (lbs)	Previous (lbs)
06/12/2026	157.9	baseline	-	31.9	baseline	-	120.1	baseline	-

Regional Body Composition Analysis

The regional body composition report below shows the 5 key regions of your body including your arms, legs, trunk, android (abdomen) and gynoid (hips region) metric and displays the composition analysis for each region.

Region	Total Fat %	Total Mass (lbs)	Fat Tissue (lbs)	Lean Tissue (lbs)	BMC (lbs)	Fat Free (lbs)
Arms	16.3%	20.5	3.3 lbs	16.3 lbs	0.8 lbs	17.2 lbs
Legs	21.8%	51.2	11.2 lbs	37.9 lbs	2.1 lbs	40.0 lbs
Trunk	20.4%	75.2	15.3 lbs	58.1 lbs	1.8 lbs	59.8 lbs
Android	19.1%	10.8	2.1 lbs	8.6 lbs	0.1 lbs	8.7 lbs
Gynoid	22.4%	23.3	5.2 lbs	17.5 lbs	0.6 lbs	18.1 lbs
Total	20.2%	157.9	31.9 lbs	120.1 lbs	5.9 lbs	126.0 lbs

Visceral Adipose Tissue (VAT)

Date	Age	Fat Mass (lbs)	Volume (in ³)
06/12/2026	38.0	0.04	1.21

How does your VAT volume compare?

Ideal | Healthy

0.00 to 52.00

A VAT volume (in³) between the level listed above is considered a healthy range. Continue to practice exercise and a balanced diet.

Increased Risk | High

52.15 to 112.10

If your VAT volume (in³) is between the level listed above you are considered to be at an increase risk. Within this range, you may consider improving your diet and increasing exercise.

At Risk | Very High

112.10 +

If your VAT volume (in³) is at or above the level listed above your risk may be considered high. If you are within this range you may consider consulting your physician.

What is Visceral Adipose Tissue (VAT)?

The Android region is that of the abdomen, and often the body type with increased fat in this area is described as "apple shaped." The Gynoid region is that around the hips and thighs and often the body type with increased fat in this area is described as "pear shaped." Understanding where fat is stored on the body is recognized as an important predictor of the potential health risks of obesity.

CoreScan estimates the VAT (Visceral Adipose Tissue) content within the android region, VAT is a specific type of fat that is associated with several types of metabolic diseases such as obesity, metabolic syndrome, and type 2 diabetes. CoreScan results have been validated for adults between ages 18-90, and with a BMI in the range of 18.5-40.

A/G Body Fat Distribution

Measure Date	Android	Gynoid	A/G Ratio
	Android fat is concentrated in the lower abdominal region.	Gynoid fat is concentrated in the hips, upper thighs and buttocks.	For optimal distribution, Android fat % should be less than your total body fat % and your A/G should be less than 1.0
06/12/2026	19.1%	22.4%	0.84

YOUR PRESCRIPTION FOR A HEALTHIER LIFE

Total Body Bone Density Report

Bone Density is critically important to our overall health & physical capability. Good, holistic nutrition is essential to maximizing peak bone mass, which is typically achieved between your mid to late thirties. Then, as we continue to age, our bones start to naturally deteriorate through a process called fibrosis, where bone structure slowly converts to fibrous tissue. Keep in mind that this measurement is of Total Body Bone Density and cannot be compared apples to apples versus what is referred to as a DEXA Bone Density, which consists of measurements of your left / right femoral neck and AP Spine (L1-L4). A DEXA Bone Density is the standard exam for observing the potential risk for Osteopenia and Osteoporosis and is typically referred by your physician.

Densitometry: USA (Combined NHANES/Lunar) (Enhanced Analysis)			
Region	BMD (g/cm ²)	YA T-score	AM Z-score
Head	2.143	-	-
Arms	0.911	-	-
Legs	1.176	-	-
Trunk	0.957	-	-
Ribs	0.774	-	-
Spine	1.089	-	-
Pelvis	1.069	-	-
Total	1.154	-0.5	-0.1

Muscle Mass Balance Analysis

The table below regionalizes your arms and legs to assess muscle symmetry. Arms will often have tissue imbalances up to 0.5 lbs, while legs will have tissue imbalances up to 1.5 lbs. Live Lean Rx looks at movement efficiency because a better balanced body composition improves overall physical capability, especially relating to functional movements.

Left / Right Side	Date	Lean Mass (lbs)	Lean %	Fat Mass (lbs)	Fat %	Total Mass (lbs)
Arms Total	06/12/2026	16.3	79.7	3.3	16.3	20.5
Right Arm	06/12/2026	8.4	79.0	1.8	17.0	10.6
Left Arm	06/12/2026	8.0	80.3	1.5	15.5	9.9
Arms Difference	06/12/2026	0.4 lbs	5.0%	0.3 lbs	1.5%	6.7%
Legs Total	06/12/2026	37.9	74.0	11.2	21.8	51.2
Right Leg	06/12/2026	18.7	73.6	5.7	22.3	25.5
Left Leg	06/12/2026	19.1	74.5	5.5	21.4	25.7
Legs Difference	06/12/2026	-0.4 lbs	-2.2%	0.2 lbs	0.9%	-0.9%

Body Composition Trending Report

The following graphs show how different regions of your body have changed over time. This image and table shows how your body's muscle development and body fat in each area has responded to your training and/or nutrition program. Each individual will gain and lose lean tissue differently. Live Lean Rx will continue to track these regions with each subsequent scan.

06/12/2026

Measured Date	Total Mass (lbs)	Total Fat (%)	Total Fat (lbs)	Total Lean (lbs)	Trunk Fat (lbs)	Trunk Lean (lbs)	Arms Fat (lbs)	Arms Lean (lbs)	Legs Fat (lbs)	Legs Lean (lbs)
06/12/2026	157.9	20.2%	31.9	120.1	15.3	58.1	3.3	16.3	11.2	37.9
